Section I : Introduction

Section II : Typical Installation (Recommended)

1. Run the Chronos e-StockCard setup program from:-

- i. Chronos e-StockCard Setup CD (Auto Run).
- ii. "Chronos e-StockCard vX.X.X" folder, double click on the "Install_eStockCard.exe".

The setup program will guide you through the steps required to install Chronos e-StockCard Client and Server components.

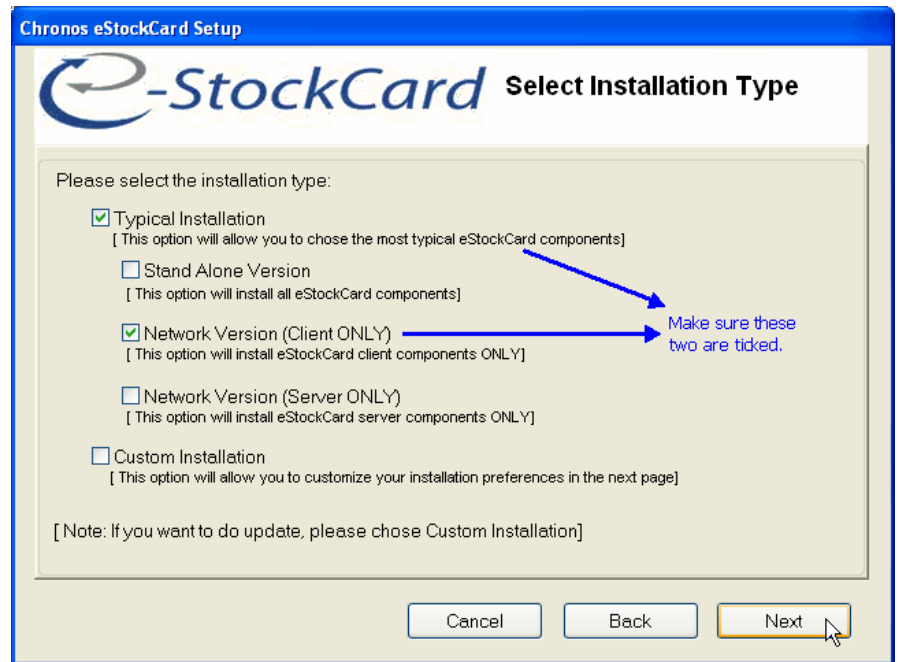

2. You will see the "Welcome to Chronos eStockCard Installation" screen. Click **Next** to continue.

3. **Tick** the "Agree With The Above Agreement" checkbox and click **Next** to continue.

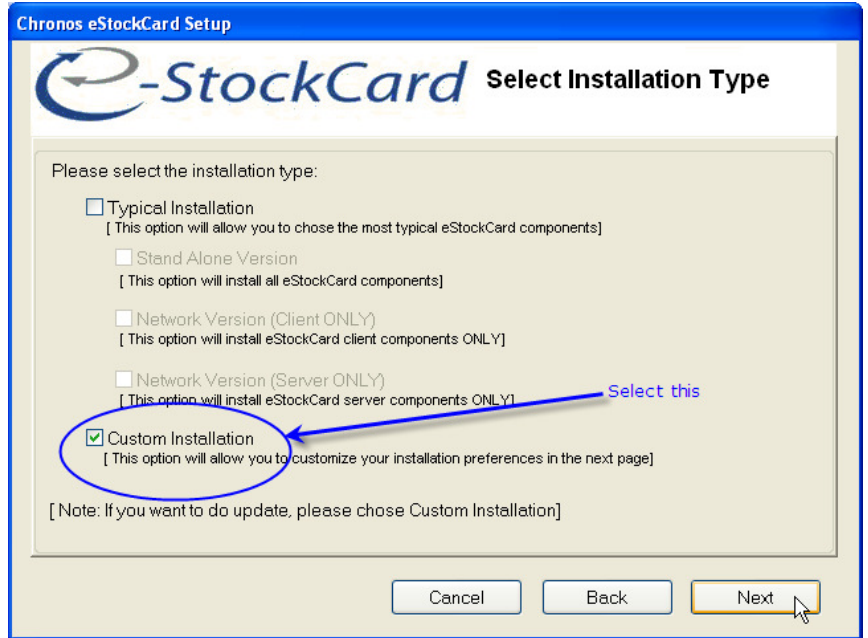

4. At "Select Installation Type" screen, select "**Typical Installation**" and "**Network Version (Client ONLY)**" Click **Next** to continue with other steps until "Installation Completed" screen shows up.

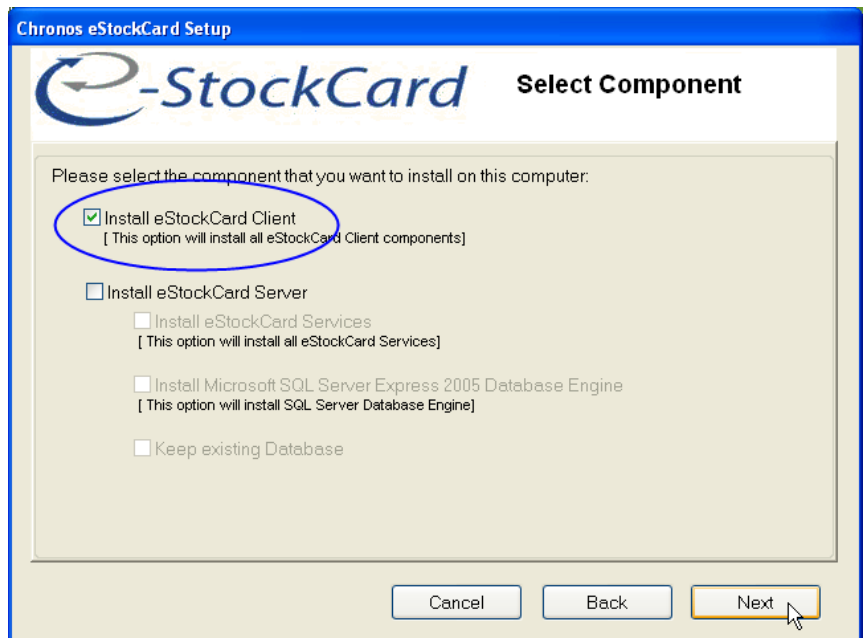

Section III : Custom Installation

1. The differences for Typical Installation and Custom Installation are the things to be selected at "Select Installation Type" and "Select Component" screen.

2. At "Select Installation Type" screen, select "**Custom Installation**". Click **Next** to continue.

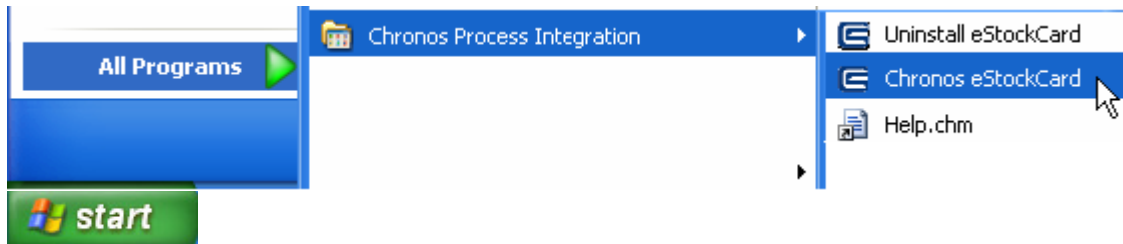

3. At "Select Component" screen, select "**Install e-StockCard Client**". Click **Next** to continue with other steps until "**Installation Completed**" screen shows up.

Section IV : Request Activate Code to Activate the License for Client PC

1. After installation complete, now you go to Windows Start/All Programs/Chronos Process Integration/Chronos eStockCard to start the e-StockCard application.

2. You will come to the login screen with empty information. Now you need to activate the license for this Client PC. Please click on the  icon to proceed.

3. This message box will prompt out then click on the **Upgrade Now** button.

4. Click **Activate** button to continue.

5. There are two options to request the Activation Code and by Email is recommended. Select **Email** and click **Next** button.

< Back Next > Cancel

7. When you come to this screen, you can see the system generated the Identification Code. Please click the **Email** button, it will call your default mail client (e.g. Microsoft Outlook) and the Registration and Identification Info will be automatically filled up in the Message. Finally, click the **Send** email button to send this Request of Activation Code email to us.

The screenshot shows the 'Registration and Activation' window with the 'Activation -By Email' section. On the left, a sidebar lists 'Installation', 'License Agreement', 'Registration', and 'Activation', all with green checkmarks. The main area has a key icon and the title 'Activation -By Email'. Below the title, it says 'To request activation code, please email the registration and identification info below to the Vendor.' A text box contains the identification code '15-BFEBFBFF00000F29-3886906C', which is highlighted with a red box. Below this is a prompt 'Please enter Activation Code:' followed by an empty text box. At the bottom, there are four buttons: 'Email', '< Back', 'Next >', and 'Cancel'. The 'Email' button is highlighted with a red box and a mouse cursor is over it.

8. After we receive your email, we will generate the Activation Code and email back to you (within 24 hours). You just copy the code given and paste it at the field provided and click **Next** button. Your Chronos e-StockCard Standard Edition will be activated

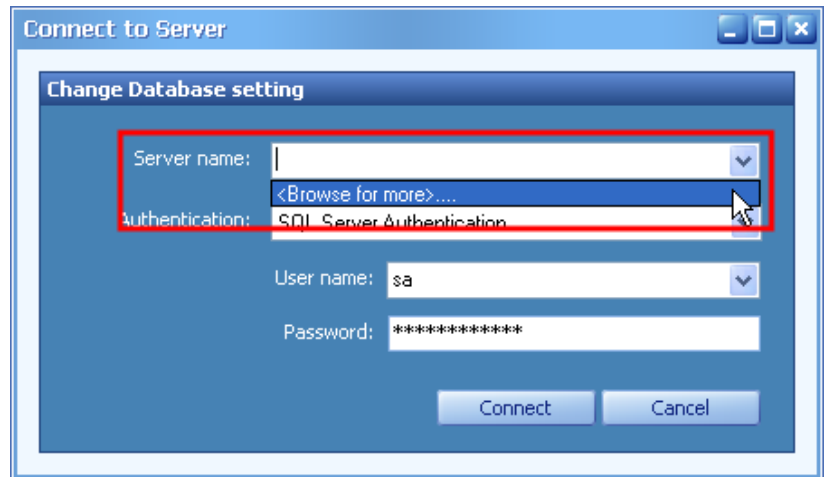

This screenshot is identical to the previous one, showing the 'Activation -By Email' screen. The identification code '15-BFEBFBFF00000F29-3886906C' is still in the text box. The 'Please enter Activation Code:' text box is now highlighted with a red box. At the bottom, the 'Next >' button is highlighted with a red box and a mouse cursor is over it.

Section V : Step-by-Step to Setup Database Connection

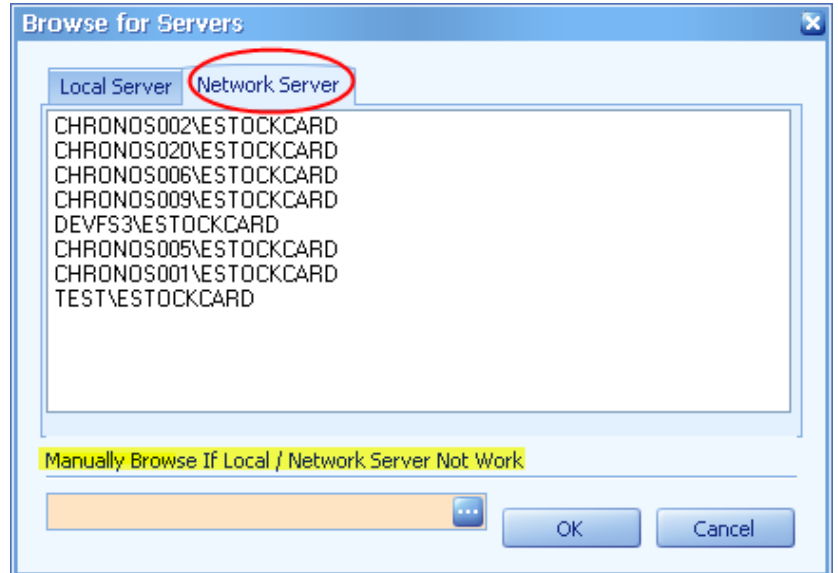

1. After you have activated the license for the Client PC and come back to the login screen, you

click on the  button again. System will prompt you the **Connect to Server** box for you to do Database Setting. You can see the **Server Name** is empty. Please do the following steps to complete the database connection settings:-

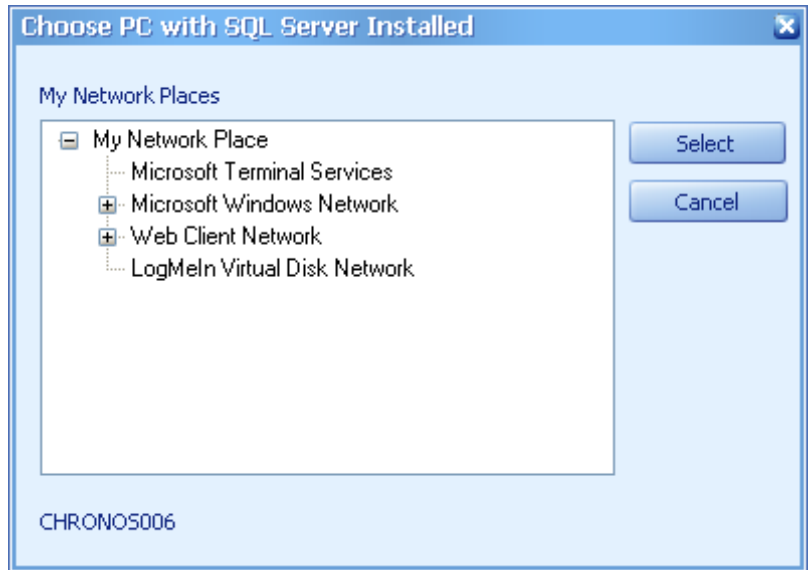

i. Click the **Server Name** drop down list and select **<Browse for more>**, the **Browse for Servers** box will appear. It consists of two tabs which are **Local Server** and **Network Server**.

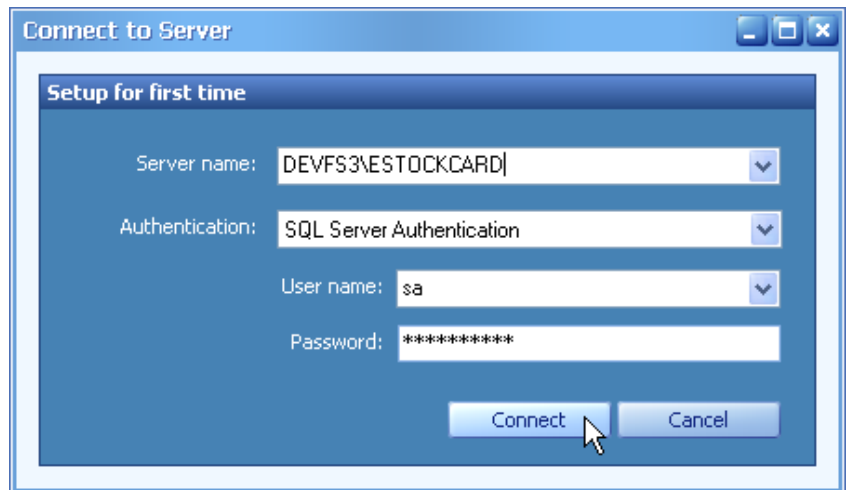

ii. Click on the **Network Server** tab, system will auto generate a list of your Network Server, click and select the Server that you want to connect to then click **OK**.

iii. If you are not sure where the Server located, you can use **Manually Browse If Local/ Network Server Not Work** to locate. Click button to open up **Choose PC with SQL Server Installed** box to browse for the Server.

2. After click OK you will come back to this screen. Lastly click **Connect** button to connect to this Server.

3. Please repeat the same steps if you want to install another Chronos e-StockCard Network Version for Client on another PC.
